

## Plans for Sports Funding 2017/18 Academic Year

The government have now allocated double our previous years sport funding from £8140 to £16,280.

Therefore, our vision for the future 2017/2018 funding will be as follows:

- ✚ Increasing the funding for qualified and experienced coaches from outside agencies plus school sports partnerships to deliver quality PE with teaching staff working alongside and enabling them to have professional development within the curriculum. Our aim is to increase staff knowledge and understanding of planning, delivering and differentiating a variety of sports. The long term aim is for staff to teach some of the newly developed sports alongside coaches in the following year as well as freeing up coaches to deliver new sports. It will also enable us to identify gifted and talented children and be able to offer specialist advice and opportunities for both staff and children to take sport further within school and outside clubs.
- ✚ After school and lunch clubs will be subsidised to enable sport to be inclusive to all and to encourage less active pupils. We will be increasing the number of sports clubs as well as developing a trained sports crew of children from upper key stage 2. The sports crew will run clubs at lunchtimes and play times to encourage play whilst giving the sports crew the opportunity to develop leadership skills.
- ✚ All key stage 2 children will receive swimming lessons as part of the national curriculum budget with confident children being paid for through sports funding to develop their skills further and identify gifted and talented children. Booster sessions will be provided for upper keys stage 2 children who are not meeting the national curriculum targets by May 2018.
- ✚ Greater participation in team events (interschool and as part of the MSN games tournaments) which will enable the school to apply for Sainsbury's Sports Mark Award this year as well as Healthy Schools Award.
- ✚ Continuing to update resources when required or identified.
- ✚ Transporting children to competitions as well as sporting festival opportunities making participation inclusive to all.
- ✚ Developing the area of Wellbeing and healthy lifestyles. Coaches coming in to work with staff and children to create a deeper understanding change for life.

The impact of this will be measured by

- ✚ Pupil / staff conferencing and questionnaires.
- ✚ Numbers of children participating in clubs and competitions entered.
- ✚ Sports mark or relevant awards being achieved.
- ✚ Impact reports made by sports coaches.
