# DT - Make Gardening Tools Using Recycled Materials

Design and make different gardening tools using recycled materials. You will need some or all of these tools and materials.

- Scissors
- Cardboard boxes, sheets of cardboard.
- Cardboard packaging - tubes, rolls
- Other plastic packaging
- Tape, string or elastic bands to join pieces.
- You could roll strips of card to form your own tubular shapes.
- You could join pieces by cutting and slotting.

We know you will have limited materials at home, so be as inventive and experimental as you can. Try out different techniques to join and construct to see what works. Please feel free to take photos of the work in progress as well as finished products too, so we can see what you have tried.

Have a look at the pictures for ideas. Have fun!
